EDUCATION

UNIVERSITY OF MICHIGAN - DEARBORN

Master of Science in Data Science

- Expected graduate in May 2027; current GPA: 4.0.

Dearborn, MI

Aug 2025 - Present

FOREIGN TRADE UNIVERSITY

Bachelor of International Business Administration

- GPA: 3.78/4.0; Excellent Academic Performance Scholarship (only 5 awarded to class)
- University Third Runner-up and Faculty Prospect Award for Undergraduate Research Contest 2022

Hanoi, Vietnam

Jul 2019 - Apr 2023

TECHNICAL SKILLS

- ML and Analytics:** AI, Machine Learning (Decision Trees, Random Forest, Gradient Boosting, Neural Networks), Statistical Models, Time-Series Forecasting, Causal Inference, A/B Testing, Natural Language Processing.
- Languages & Frameworks:** Python (Pandas, Scikit-learn, NumPy, Matplotlib, Seaborn, Tensorflow), SQL, PySpark.
- Data Analytics:** Data Modeling, ETL, Data Mining, Segmentation.
- Big Data & Cloud Platform:** Spark, HDFS, GCP (Big Query, Vertex AI), Airflow.
- Data Visualization & BI Tools:** Tableau, PowerBI, Metabase, Google Analytics, Looker, Excel, SAP Analytics.

PROFESSIONAL EXPERIENCE

GEARLAUNCH

Data Analyst

Hanoi, Vietnam

Nov 2023 - Jul 2025

- Served as the **sole data analyst**, managing the company's end-to-end internal analytics infrastructure and presenting business analysis insights directly to C-level leadership and department heads.
- Implemented and optimized scalable data pipelines using SQL, Python, GCP, and Tableau, streamlining reporting workflows and increasing data processing efficiency by 3 times more data from 3+ databases without additional infrastructure.
- Designed and deployed statistical models (regression, clustering) and machine learning (time series, XGBoost, Random Forest) to support e-commerce executive strategy; increased annual sales KPIs by 20%.
- Analyzed data from 35,000 monthly active user stores with ad-hoc and automated analytics to guide marketing analytics and user management strategies, resulting in an average of 50% increase in new sign-ups and 30% decrease in users' issue tickets.

VCCORP

Data Analyst - Team Lead

Hanoi, Vietnam

May 2023 - Nov 2023

- Managed a team of four to perform full-cycle A/B testing for recommendation engines deployment on 7 digital media websites resulting in 10–30% monthly gains in core web KPIs.
- Designed and built automated A/B testing evaluation pipelines used in the company's internal analytics platform, standardizing experiment analysis and reducing manual documentation by 5+ hours per week.
- Architected a reusable and scalable A/B testing framework that was later adopted as the foundation for a client-facing analytics product by the consulting teams.
- Maintained primary responsibility of advanced ad-hoc analysis for 3 digital publishing platforms, providing data-driven insights for editorial teams.

Data Analyst

Mar 2022 - May 2023

- Designed and monitored 30+ KPIs of core products with automated dashboards and provided in-depth ad-hoc analysis for 5 digital publishing apps and websites.
- Developed user segmentation that helped increase app notification system engagement to 30% within 3 months.

PROJECTS

- Deer Collision Prediction (2026):** Built predictive models for real deer collisions data using K-Means clustering, supervised learning (Random Forest, Boosting), and statistical models with feature engineering and resampling techniques (PCA, Bootstrapping, Cross Validation).
- Recommendation Systems for Online Retail (2025):** Built a recommendation system for Online Retail dataset using content-based and collaborative filtering.
- Vehicle Crash Frequency and Severity Prediction (2026):** Deployed predictive modeling and diagnostics for an integrated vehicle crash dataset using statistical models (linear regression & logistics regression).
